

# SANITIZED® COLORCAULK

---

## DESCRIPTION

---

Davco *Sanitized*® Colorcaulk is an acrylic based caulking compound. Special chemicals are added at the point of manufacture to greatly improve the workability, curing, flexural strength and resistance to a broad spectrum of fungal, algae and bacteriological degradation.

## USES

---

Davco *Sanitized*® Colorcaulk can be used for filling of:

1. Expansion joints.
2. Junctions between tile and bath, cupboards, shower bases.
3. Joints where internal tile walls and floors meet.

## FEATURES AND BENEFITS

---

- A selection of 8 colours are available, chosen to match the popular colours from the *Sanitized*® Colorgrout range. This enables the use of the Colorcaulk along side the *Sanitized*® Colorgrout.
- Each batch is strictly quality controlled to ensure consistency of colour from batch to batch.
- Pigments within the caulk are evenly and totally dispersed. All colours are colourfast and are totally ultra-violet (UV) resistant.

## SURFACE PREPARATION

---

- Ensure all joints are free from dust, dirt, loose contaminating particles and excess water.
- Excess adhesive must be raked out of the joints prior to the application of *Sanitized*® Colorcaulk.

## APPLICATION

---

- Use a cartridge gun to apply the Colorcaulk ensuring that the entire width and depth of the joint is filled.
- Allow the Colorcaulk to cure for a period of at least 24 hours at 25°C, prior to putting the area into use.
- Clean off excess Colorcaulk from the face of the tiles as it is being applied. **DO NOT** allow the Colorcaulk to dry on the face of the tiles.

- For unglazed, porous tiles, like terracotta's, test the method of clean-up prior to using Colorcaulk. Masking of the joint may be necessary.

## PRECAUTIONS

---

- Do not use Colorcaulk for joints wider than 6mm.
- When using Colorcaulk in wet areas, such as shower recesses, allow to cure for at least 48 hours, prior to putting the area into use.
- Do not use acid to clean tiles, especially when Colorcaulk is used.
- All products are guaranteed when installed in accordance with the relevant Australian Standard, the current technical datasheets, specification and instructions for use. This guarantee does not cover issues beyond the control of the manufacturer such as efflorescence, shade variations, variable application techniques and extreme environmental conditions.

## COVERAGE

---

The coverage varies from the size of the tile and the width and depth of the joint.

### As a general guide:

- Approx 5 lineal metres for a 5mm wide and 10mm deep joint.

## CLEAN UP

---

Davco *Sanitized*® Colorcaulk must be cleaned up with warm water while it is still wet.

## PACKAGING

---

All colours are available in 300ml cartridges.

## SHELF LIFE

---

Up to 12 months in unopened cartridges stored in a cool dry place.
